## ABSTRACT:

PURPOSE: A hair tonic, containing an extract of mistletoe which is a herb medicine as an active constituent, safe for the human body without skin irritation and having very remarkable trichogenous and hair growth promoting effect by application.

CONSTITUTION: A hair tonic obtained by using an extract of pulverized mistletoe (branch, leaf or treetop of Viscum album L. var. lutescens Makino or Loranthus yadoriki Sieb. of the family Loranthaceae) with a solvent, e.g. methanol, water or ethyl acetate, etc. The above-mentioned extract is preferably used in an amount of 0.1~5wt% expressed in terms of a dried material in a hair tonic composition. The extract of the mistletoe alone has remarkable trichogenous effect, but use together with an extract of Angelica pubescens Maxim., polygala root, senega, glossy privet, etc., provides hair tonic effect almost equal to or somewhat better than that of the above-mentioned extract.

## ABSTRACT:

The invention is based on the object of reducing or stopping hair loss and effecting new hair growth by well-tolerated vegetable active substances.

An alcohol-containing hair tonic formulation is characterised in that the formulation consists of alcohol extracts of mistletoe (Viscum album) or leaves of the olive tree (folia oleae) or mixture thereof, plus nicotinamide, D-alpha-tocopherol, D-pantothenol and lecithin. The components are dissolved in alcohol by an emulsifier.

The hair tonic formulation of this type is very well tolerated, reduces hair loss and promotes regeneration of hair on the head.
